today's graduates should be grounded in the basics of personal finance and possess the skills and knowledge necessary to make informed decisions and take responsibility for their own financial well-being. Faced with an array of complex financial services and sophisticated products, many graduates lack the knowledge and skills to make rational informed decisions on the use of their money and planning for future events such as retirement. This book shows what you can do to improve financial literacy awareness and education. It covers the use of interactive games and tutorials, peer-to-peer mentoring and financial literacy contests in addition to more formal education. It gives you a sample of approaches and experiences in the financial literacy arena, divided into three parts: the book covers financial literacy education for grades K-12, college and post-college.

It is a well-known saying that money does not buy happiness, but it certainly helps in life. It is important to have enough of it to satisfy our needs and to secure ourselves from emergency situations. What do adults think and what about the youth? What is their approach to money? What do they know about finances and how are their skills in everyday financial management coming along? What kind of knowledge and skills should be provided? Do young people in different countries represent similar or different approaches to financial matters? Using the results of a research on young people in Poland and Germany, the authors draw a picture of financial literacy. They furthermore present a number of recommendations that help developing the knowledge and the financial skills of young people in practice.

College students are particularly vulnerable to making poor financial decisions. One method of addressing personal finances and financial stress among students of higher education is through university-based financial education programs. Student financial literacy program development presents effective strategies to assist in the implementation or the enhancement of a program as a tool to improve students' educational experience and financial well-being. It presents the key components of financial education programs designed to address the growing concerns associated with high levels of debt and low levels of financial literacy among college students. Student financial literacy campus-based program development is packed with financial education and counseling information and guidance. It was very difficult to write this review as I wanted to share all the excellent direction this book provides. The editors and contributing authors have developed an excellent resource for not only those interested in developing or enhancing a campus-based financial education program but also for anyone involved in financial education counseling and planning. Rebecca J. Travnichek, Family Financial Education Specialist, University of Missouri Extension, Journal of Financial Counseling and Planning.

This book explores the issue of consumer financial education, responding to increased interest in and calls to improve people's financial literacy skills and abilities to understand and manage their money. New conceptual frameworks introduced in the book offer academic audiences an innovative way of thinking about the project on financial literacy education using the concepts of education regulation and financial knowledge democratisation to analyse the financial education project in the UK. The book exposes serious and often ignored limitations to using information and education as tools for consumer protection. It challenges the mainstream representation of financial literacy education as a viable solution to consumer financial exclusion and poverty. Instead, it argues that the project on financial literacy education fails to acknowledge important dependences between consumer financial behaviour and the socio-economic, political and cultural context within which consumers live. Finally, it reveals how these international and national calls for ever greater financial education oversimplify and

underestimate the complexity of consumer financial decision making in our modern times
